System Description

The HSTRU is a fabricated enclosure with hydraulic tools and supplies mounted on an M116A2 trailer. Efforts to modernize the HSTRU capabilities, technology and configuration are currently underway. Customer feedback is essential to the development of a modernized HSTRU system that meets the needs of today's Army.

System Mission

Provides securable shelter for hydraulic test and repair tools and supplies. Allows the field to test, repair, and fabricate both tube and hose assemblies for weapons systems, wheeled and tracked vehicles, and construction equipment.

This system is not currently in reset.

Reset Type

Reset Work (Field Level) - Work performed to correct equipment faults that are performed at the ORG/DS level; performed by unit level soldiers, augmented by contractor as required.
